Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Specification

The abstract of the disclosure is objected to because it exceeds 150 word maximum. Correction is required. See MPEP § 608.01(b).

In The Claims

In claim 11, line 11, "he" should read "the".

In claim 11, line 15, "though" should read "through".

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 11 and 15-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Feenan et al (US 4,027,643) in view of Yamagishi (US 6,076,488).

Feenan et al shows every thing (col. 3, lines 40-68; and col. 4, lines 1-10; and figure 4) except for starting a forced-air fan at the second temperature to urge ambient air through air passages of the oil cooler. Yamagishi shows starting a forced-air fan at the second temperature to urge ambient air through air passages of the oil cooler (col. 6, lines 3-10). It would have been obvious to a person having ordinary skill in the art to modify Feenan et al by employing starting a forced-air fan at the second temperature to urge ambient air through air passages of the oil cooler in order to cool the oil passing through the oil cooler.

Claim 13 is rejected under 35 U.S.C. 103(a) as being unpatentable over Feenan et al (US 4,027,643) in view of Yamagishi (US 6,076,488) as applied to claims 11 and 15-18 above, and further in view of Takahashi (US 5,701,853). Takahashi discloses the oil cooler (22) is a stack-tube design. It would have been obvious to a person having ordinary skill in the art to further modify Feenan et al by employing stacked tube oil cooler in order to the replace oil cooler.

Allowable Subject Matter

Claims 1-10 are allowed.

Claims 12,14,19 and 20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The references by Tsuruta (US 6,772,824) and Willingham (US 4,257,554) both disclose fan assembly for use with oil cooler.
